# THE FORDYCE MITCHEL COLLECTION AT THE YALE UNIVERSITY ART GALLERY – PART I

**Abstract:** In 2018, the Numismatics department at the Yale University Art Gallery received a donated collection of 223 bronze and silver coins, broadly from the Greek, Hellenistic, and Roman periods. The collection was assembled in the 1950s and 1960s by Professor Fordyce W. Mitchel, a Yale alumnus, and was donated by his three children, Fordyce, Henry, and Magdalen. Prof. Mitchel received numismatic tutelage from the renowned numismatist Alfred R. Bellinger, who at the time served as de-facto curator for the Yale numismatic collection. This article serves to document and highlight the body of material in order to make its existence known to the wider academic community. A catalogue of the coins is included and images of the coins are freely available online on the Yale University Art Gallery website.

## INTRODUCTION

In the winter of 2017, Magdalen (“Mauni”) Mitchel contacted the curator of Numismatics at the Yale University Art Gallery to inform of her intent, together with her two siblings (Henry and Fordyce), to donate their father’s collection of ancient coins. By April 2018, the collection had been physically transferred to Yale and the final paperwork was completed by November.

The collection was assembled by Professor Fordyce W. Mitchel between the 1950s and 1960s and consists of 223 bronze and silver coins, broadly from the Greek, Hellenistic, and Roman period.<sup>1</sup> Within the collection several groupings can be identified (e.g. Macedonia, Thessaly, and Athens), while the overall collection appears to have been tailored for pedagogical purposes.

Prof. F. W. Mitchel obtained all three of his degrees at Yale, completing his Ph.D. in 1954.<sup>2</sup> Although his Ph.D. dissertation focused on Greek history (*An investigation of the Chronological Systems used by Herodotus*), he received numismatic support from Prof. Alfred R. Bellinger, who is the outstanding figure in the history of the Yale numismatic collection and served as de-facto curator for the Yale numismatic collection. Prof. Mitchel, while a graduate student, was also able to refine his numismatic training, July through September 1944, at the American Numismatic Society where he became the first Edward T. Newell Summer Scholar in Numismatics.<sup>3</sup>

Over the course of his career much of his work revolved around fourth-

<sup>1</sup> Pers. comm. Magdalen Mitchel, 20 November 2017.

<sup>2</sup> A.B., A.M. Yale, 1944; Ph.D., 1954.

<sup>3</sup> This program had been proposed by Bellinger, who was also a member of the Newell Committee: Minutes, Council meeting, 4/15/1944, p. 3.

century topics although he was known to contribute to wider discussions in Greek history, such as the Athenian navy, and above all for his dedication to teaching. He is well known to have pushed all those around him to higher standards, never afraid to criticize the work of others. He was, however, equally unselfish, always ready to offer his assistance with a breadth of knowledge that stretched from legal and constitutional history to politics, society, trade and military history and now, as has previously been unrecognized, his ability to integrate numismatics into the lives of those around him.

Shortly after his untimely passing, in 1986, his widow Marguerite established an endowment at the University of Missouri to invite a leading scholar to give an annual lecture on an aspect of Greek history in honour of her husband, which metamorphosed in 2000 into the biennial Fordyce Mitchel Memorial Lecture Series. Since its inception, numerous world-renowned scholars, such as Prof. Christopher Pelling, have had the distinction of giving a series of “Mitchel” lectures, which have subsequently been published by the University of Missouri Press or the University of Texas Press.

The donated collection bears the credit line, Gift from Mitchel family in honor of Professor F. W. Mitchel, A.B., A.M. Yale, 1944; Ph.D., 1954, and it testifies to the generosity of the Mitchel family. Long after the death of Prof. Mitchel, his family continues to preserve his legacy and commitment to the education of the ancient world. This catalogue cannot do full justice to the carefully formed body of coins that provides material for artistic, historical, and numismatic study and education as well as public exhibition. Its inclusion here can only serve to attest to the breadth of the material while giving insight into the collector himself, who first became acquainted with ancient coinage at Yale, where the collection now resides in the hope that it too may help instruct a new

generation of Classicists.

**THE COINS**

The focus of this paper is to present the catalog of the Greek and Hellenistic coinages that form part of the Mitchel collection as well as to highlight only one interesting coin. The readers are encouraged to use the online catalog to view the coins and make their own observations. All the material may be freely used and reproduced (see the Yale Art Gallery website for terms and conditions).

One of the most interesting piece is an octobol struck at Alexandria in 266 BC during the reign of Ptolemy II (2018.177.114), according to older references that others attribute to the early years of Ptolemy III. Although the coin weighs an impressive 82.10 grams this is significantly underweight from the usual 91.2 grams. Its current weight does not fit any clear classification of early Ptolemaic bronze coinage. Most intriguing, however, is the misstrike that is only visible on the reverse, where the second half of the legend is split on two lines. Adding further intrigue is the fact that only the right side of the reverse is affected while the rest appears as usual, which likely offers evidence to the minting practice at the time.

**CATALOGUE**

What follows below is a catalogue of the first half of collection. The Greek coins have been arranged following Head’s *Historia Numorum* and catalogued using various relevant catalogues.<sup>4</sup> Roman coins will follow in a later catalogue. Roman Provincial coins (Greek Imperials) have been included but have been separated from the traditionally ascribed Greek section. Images of all the coins are online and freely available (<https://artgallery.yale.edu/>) so only a few high-resolution images are included with this catalog.
